## Planning

I have chosen to build on what I have done in previous assignments. However, there are some changes which I think should be improved such as diagrams, design, test cases and vision document.

### Project Goal and Milestones

	Goal/Milestones
<b>Project</b>	The goal is to build and test all the functions present in the API.
<b>Iteration #1</b>	The goal is to modify diagrams including use cases diagrams and design for <i>Remove a book</i> and <i>View a list of books</i> . In addition, modify test plan, test cases related to these use cases and its implementation.
<b>Iteration #2</b>	The goal is to create diagrams, design and implementation for <i>Add a book</i> , <i>Edit a book</i> and <i>View a book</i> . In addition, create test cases related to these use cases and implement them as well as implement unit test related to this newly implemented code.
<b>Iteration #3</b>	The goal is to create diagrams, design and implementation for <i>Search a book by author or title</i> . In addition, create test cases related to these use cases and implement them as well as implement unit test related to these newly implemented code. At last, perform API testing, update project plan and create test suits.
